

UTICA[®] Solar & Wind Controller

Applications

Product can be used to supply power for those unmanned regions like independent solar&wind hybrid power generation station, high way, the coastal islands, remote mountainous regions, border posts, landscape lighting site, and street light site. Besides, it can apply to vertical axis wind turbine.

Features

- Recognize 12V/24V automatically
- Wind turbine MPPT track point adjustable
- Electronic components in high quality
- Complete protection function
- Solar and wind generation capacity and electricity consumption visible.
- Eight modes of load output optional.
- RS232/RS485/RJ45/GPRS/WIFI/Bluetooth/Zigbee monitor modes optional
